WATER STORAGE TANKS & CISTERNS

Norwesco has a full range of both above and below ground potable water storage tanks for virtually any application. Campgrounds, resorts, residential or vacation homes, construction or industrial sites, Norwesco has a tank to meet your water storage needs. Norwesco tanks are manufactured to strict quality guidelines to ensure years of high performance use. Polyethylene water storage tanks are ideal for instances when drinking water must be hauled in or if a well does not meet consumption needs. Norwesco tanks are manufactured using resins that meet FDA specifications to ensure safe storage of potable water. Below ground cisterns feature the same rugged, ribbed design found in septic tanks and are light weight for ease of transport and installation. A 20" self-locking manhole cover is a standard feature. **MANHOLE EXTENSIONS AS PICTURED ON DRAWING, ARE NOT INCLUDED IN THIS PRICE. SEE PAGE 24B FOR EXTENSIONS AND OTHER ACCESSORIES.**

\$ 327.00
325CIS

325 GALLON CISTERN FDA approved polyethylene cistern for below ground burial use, with one 20" diameter manhole. 54" diameter spherical (round) shape x 51" high

\$ 538.00
600CIS

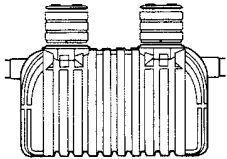

600 GALLON CISTERN FDA approved polyethylene cistern for below ground burial use, with one 20" diameter manhole 101" long x 51" wide x 42" high

\$ 824.00
